

TO WHOM IT MAY CONCERN

McLane Polska is a wholesale distributor of fast moving consumer goods to the retail trade in Poland. Our customer list includes multinational hypermarkets, supermarkets, petrol and convenience groups, as well as independently owned traditional Polish grocery stores and shops.

In 1999, Eastwave Building Company constructed and then sold to us a 10 000 square meter multi-temperature distribution center, and office in Błonie, a suburb of Warsaw.

About the project:

- turnkey from start to finish,
- they handled all necessary governmental licenses, approvals, permits, etc., no small issue in Poland,
- clearly defined design and construction schedule,
- equaled or surpassed all construction guidelines regarding materials,
- allowed our participation and approval of the subcontracted freezer floor construction company,
- they were flexible and responsible to real time requirement changes during the project,
- on time and on budget completion.

I would not hesitate to recommend their skills and services toward any construction project you contemplate.

Sincerely,

J.E. Kilkenny
Senior Vice President
McLane International
